

SIDE ENTRY 6U CABINET

Description

A totally new cabinet designed by IntroDelta ideal for installation within an occupied room.

The cabinet is welded construction powder coated grey, is 300mm deep however allows 455mm of usable depth behind the vertically mounted 19" profiles.

There are two separate doors on the cabinet, a lockable side glazed door that reveals the 6U profiles and a solid steel lockable front door that reveals the area to the rear of the profiles and a further area at the base of the cabinet that can be used for storage of non-rack mountable equipment. Cable ways are provided between each compartment and the rear side face is vented.

Other sizes can be produced, cost is dependant upon quantity.

Cabinet sizes are as follows: -

Height	702mm
Width	550mm
Depth	300mm
U size	6U

Ideal for an office environment where more customary cabinet styles protrude within the room space, look unsightly & can create a hazard.
