

The AirGuard® GTAG 4 is ideal for new and existing installations for location in a raised floor system.

The GTAG 4 cable seal will provide an opening up to 80 x 80mm

For retrofit situations the GTAG3 should be considered.

This AirGuard® unit provides an effective, easy to install, economical method to optimise the thermal management through a raised floor.

Dimensions

Overall size : 175mm x 162mm
Cut out required: 107mm x 109mm
Cut out if at perimeter : 128mm x 109mm
Useable aperture : 80mm x 80mm

Features

- Overlapped brushes improves cable sealing properties
- Latched removable brush section allows easy removal
- Flame retardant heavy duty ABS construction with nylon 6 brush
- Simple and inexpensive installation
- AirGuard® integrates the access floor static dissipative system
- RoHS compliant

Benefits

- Reduced airflow loss and increased under-floor static pressure
- Improved cooling efficiencies and extended cooling life
- Reduction of plant running costs by assisting proper airflow within the environment
- Can assist achieving hot/ cold aisle concepts
- Assists in sealing under floor areas from contamination
